A Celebration of Triumph: Vijayadashami

Shraddha Tambaram hosted a vibrant and joyous celebration for Vijayadashami (Dussehra) at SCA Campus . An auspicious day, which marks the victory of good over evil, was a wonderful occasion for our community to come together in spirit and devotion.

A truly special part of the day was the Vidyarambham ceremony, where young children wrote their first letters on rice and new students were welcomed. This ritual signifies the beginning of formal education and the pursuit of lifelong learning.

A Splash of Serenity: Blue Day Celebration

Shraddha Tambaram was transformed into a serene sea of blue as we enthusiastically celebrated 'Blue Day' with our Kindergarten students!

Blue Day is not just a colorful theme, it's a dedicated activity to help our young learners develop cognitive skills by identifying a primary color, while also introducing them to the emotional and natural significance of blue.

Students and teachers came dressed in various beautiful hues of blue—from navy and royal blue to turquoise and sky blue—creating a stunning visual treat.

Teachers engaged the children with rhymes and stories focusing on blue objects, reinforcing vocabulary and helping them make the cognitive link between the color and its presence in the natural world.

Focusing on Wellness: Eye & Dental Health Camp

Shraddha Tambaram recently organized a comprehensive Eye and Dental Health Check-up Camp as part of our commitment to the holistic well-being of our Students.

A team of specialist doctors, nurses, and support staff worked tirelessly throughout the day to provide thorough check-ups, focusing on preventive care and early detection.

Students identified with significant vision issues or serious dental problems like root canal or extraction were provided with referral letters for follow-up treatment. Also educated students about the importance of eating healthy food to maintain overall health.

PTM: ENGAGING MINDS, PARTNERING FOR SUCCESS

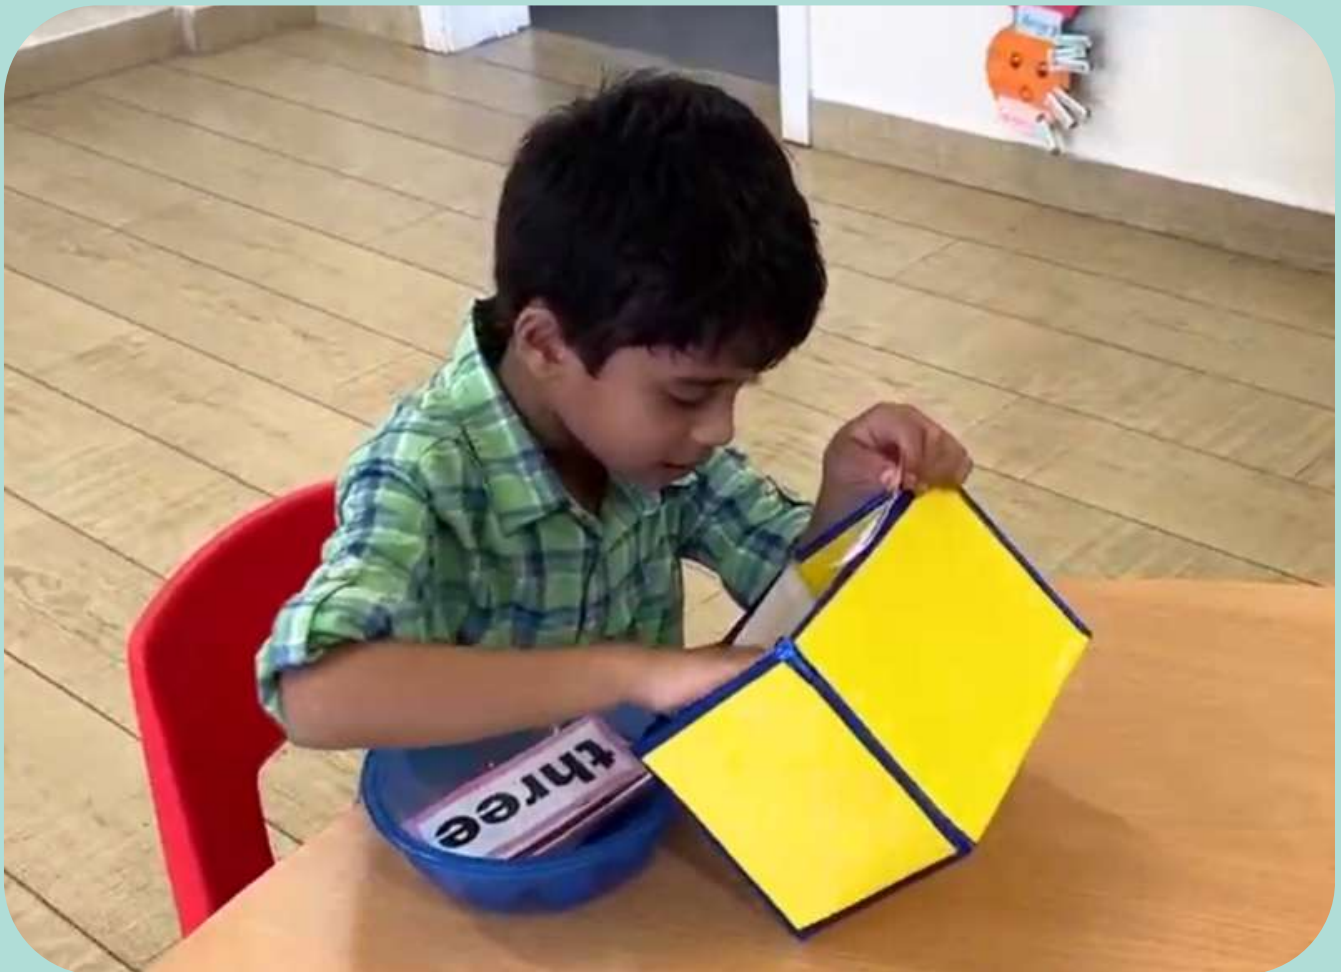

An activity-based Parent-Teacher Meeting (PTM) for Kindergarten is a dynamic strategy that shifts the focus from merely reviewing report cards to experiencing the learning process firsthand.

The main objective of such an approach is to demonstrate the child's knowledge rather than merely discuss it.

During these sessions, students and parents were encouraged to participate in short, hands-on activities such as sorting blocks for numeracy or using tongs for fine motor skill practice, thereby gaining a direct insight into the specific skills being focused upon in the kindergarten classroom.

Through Activity based approach, verbal feedback regarding a child's strengths and areas needing improvement is concretely supported by the actual tasks performed in front of the parents, ensuring that clear, actionable strategies for home reinforcement are communicated, and a true partnership between the home and school is established.

Illuminating Minds: Celebrating Diwali 🪔✨

The festival of lights, Diwali, was celebrated with immense joy and traditional fervor in the campus, reinforcing the spirit of togetherness and the triumph of light over darkness. The celebrations were meticulously planned to blend cultural rituals with fun, engaging, and often eco-friendly activities for students.

Children painted and adorned earthen lamps (diyas) with vibrant colors and glitter, symbolizing the illumination of knowledge. The creation of beautiful, handmade paper lanterns showcased their artistic talent and decorated the school premises.

Students and teachers came dressed in traditional ethnic wear, adding a splash of color and elegance to the occasion. The day was marked by the exchange of greetings and sweets, fostering a bond of community and friendship among students.

Teachers used the opportunity to reinforce the message of Diwali safety, particularly the mindful and restricted use of fireworks, aligning with their eco-friendly focus.

Splashing Fun and Learning: Monsoon Day Celebration 🌧️🐸

Shraddha Children's Academy in Tambaram transforms the arrival of the rainy season into an engaging and joyful learning experience through its special Monsoon Day celebration, for the Kindergarteners. This event blends sensory exploration with festive activities to celebrate the vital role of rain.

Students were dressed in bright raincoats and carrying their favorite umbrellas, turning the school into a lively, colorful spectacle.

Songs and rhymes related to rain, clouds, and water were played and sung, encouraging simple dances and actions that convey the joy of the season.

The highlight is typically a safe and supervised water play session. Children were allowed to splash and play in water, experiencing the cool relief and joy.

The Monsoon Day at Shraddha Children's Academy is a wonderful example of experiential learning, turning a weather phenomenon into a joyous and educational event for the young minds.
