5-7

- ✓ Yoga
- ✓ Fireless Cooking
- ✓ Phonics
- ✓ Story Telling
- ✓ Sudoku
- ✓ Spell and Say
- ✓ Rangoli Design
- ✓ Tamil & Hindi letters
- ✓ Art & Craft

Little Yogis, Big Zen!

Warm sunshine, giggles, and big stretches—our little campers had an absolute blast during our Summer Yoga Session .

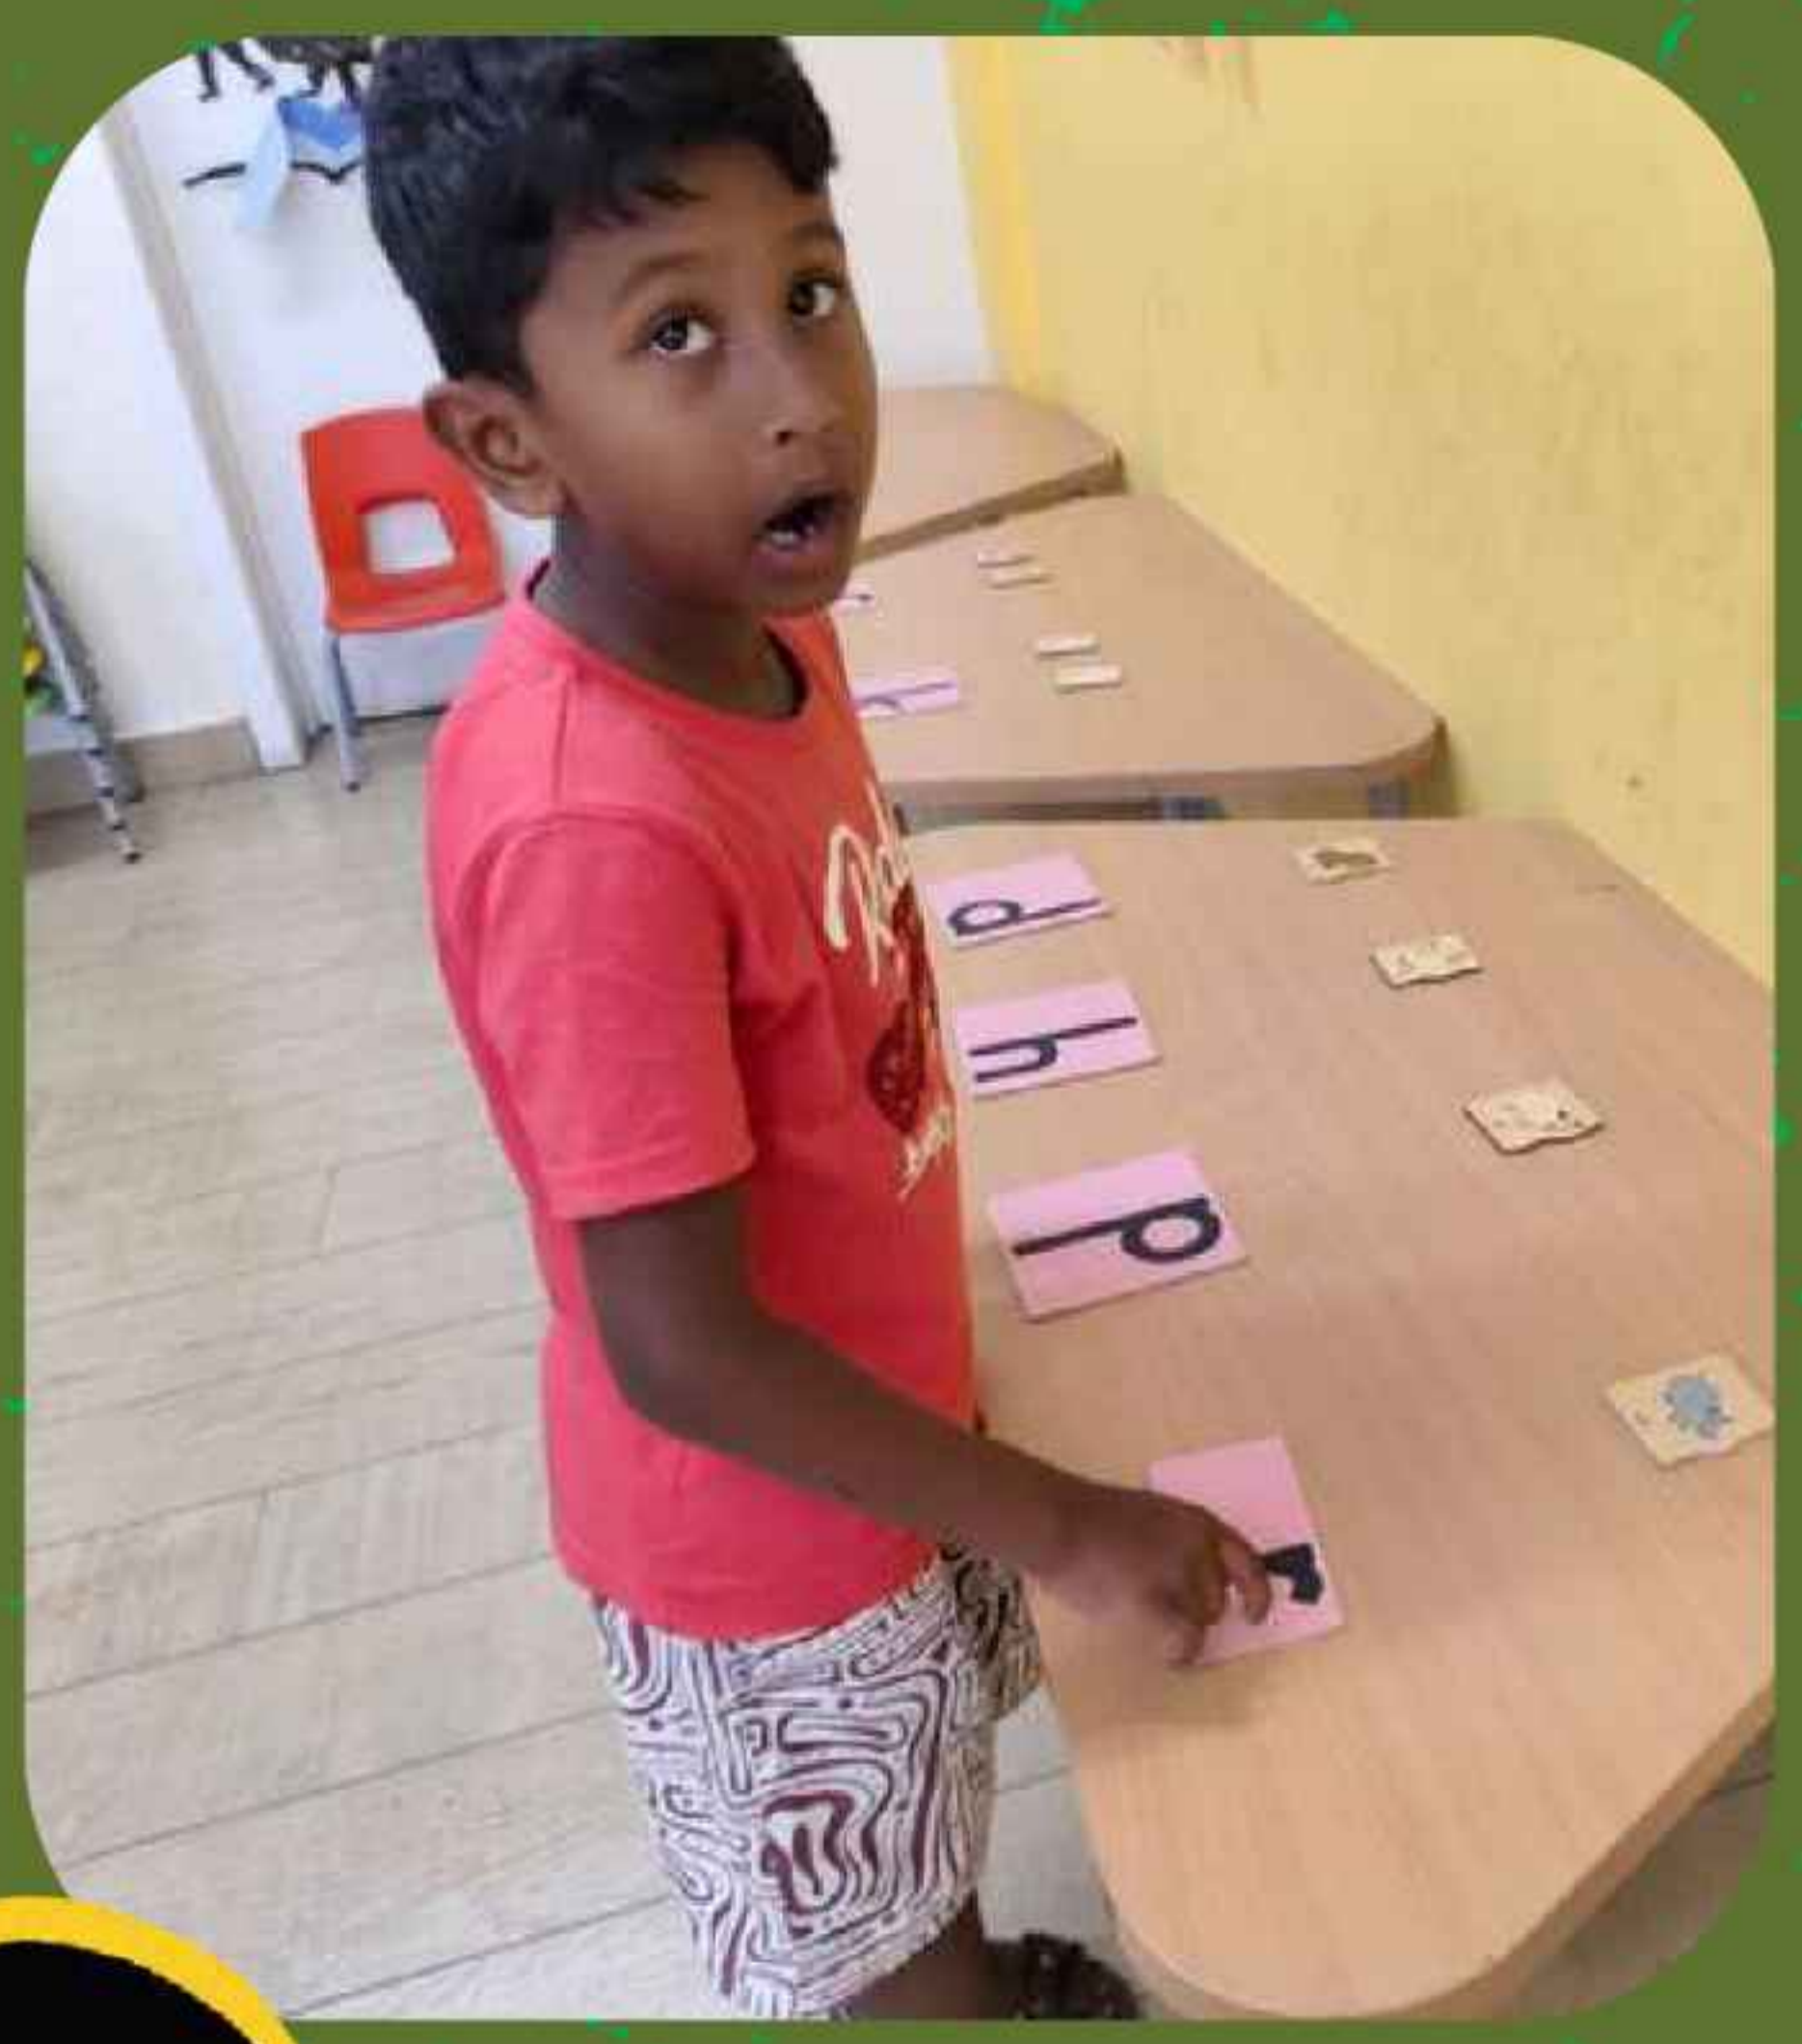

Tiny Chefs, Big Flavors: Fireless Fun

We are moving away from the stove and letting our little chefs take charge! This fireless cooking experience helped UKG to Grade 2 students sharpen their fine motor skills. By handling fresh ingredients, they boosted their sensory awareness and learned the basics of nutrition. Most importantly, it built their confidence and independence, showing them that they can create delicious, healthy snacks all by themselves!

Phonics Fun

At Shraddha Wonderland, our Sound Detectives learned to crack the reading code! For our younger kids, this builds the "ear muscles" needed to blend letters into first words. For the older children, it provides the secret tools to decode longer words and master spelling. When school starts, they won't just see letters—they'll have the confidence to turn those sounds into stories!

The Magic of Story Time!

When a book opens, our Playgroup to LKG Curious Cubs do more than just listen—they embark on an emotional journey! Through teacher-led storytelling, these little ones are building vital listening skills and vocabulary. By connecting stories to real feelings, they are developing the imagination and focus needed to become confident future readers.

Our Little Narrators

The Junior Story-Makers are taking over the narrative, our objective is to shift kids from listeners to creators. By leading their own narratives, students build the confidence to find their unique voices, explore their imagination, and realize that they have the power to tell their own stories. We've shifted from listeners to creators as we explore the magical art of storytelling, led entirely by the children themselves.

The Joy of Coloring

Every blank page is a playground for the imagination! We are excited to see our happy artists take charge as they turn simple lines into splashes of joy. It is wonderful to watch them discover just how much fun they can have with all their favorite colors!

The Sudoku Spark

Mastering grid patterns now builds the logical "mental muscles" students need for the upcoming year, especially in math and science. This hands-on play turns complex challenges into rewarding "aha!" moments of discovery. By making structured problem-solving a habit, they'll enter their new classrooms with the sharp critical thinking and confidence needed to succeed.

Firm Fingers & Fun Fitness

Our active adventurers have been busy moving their bodies in big and small ways! We focused on the exciting journey of physical development, exploring how every jump and every pinch helps us grow stronger and more coordinated.

Active

The Spell & Say Boom!

FUN

At Spell & Say, we don't just look at words-we make them LOUD! We've traded standard books for active play, turning 'boring' letters on a page into sound explosions that fill the whole room.

Paper Rangoli Magic

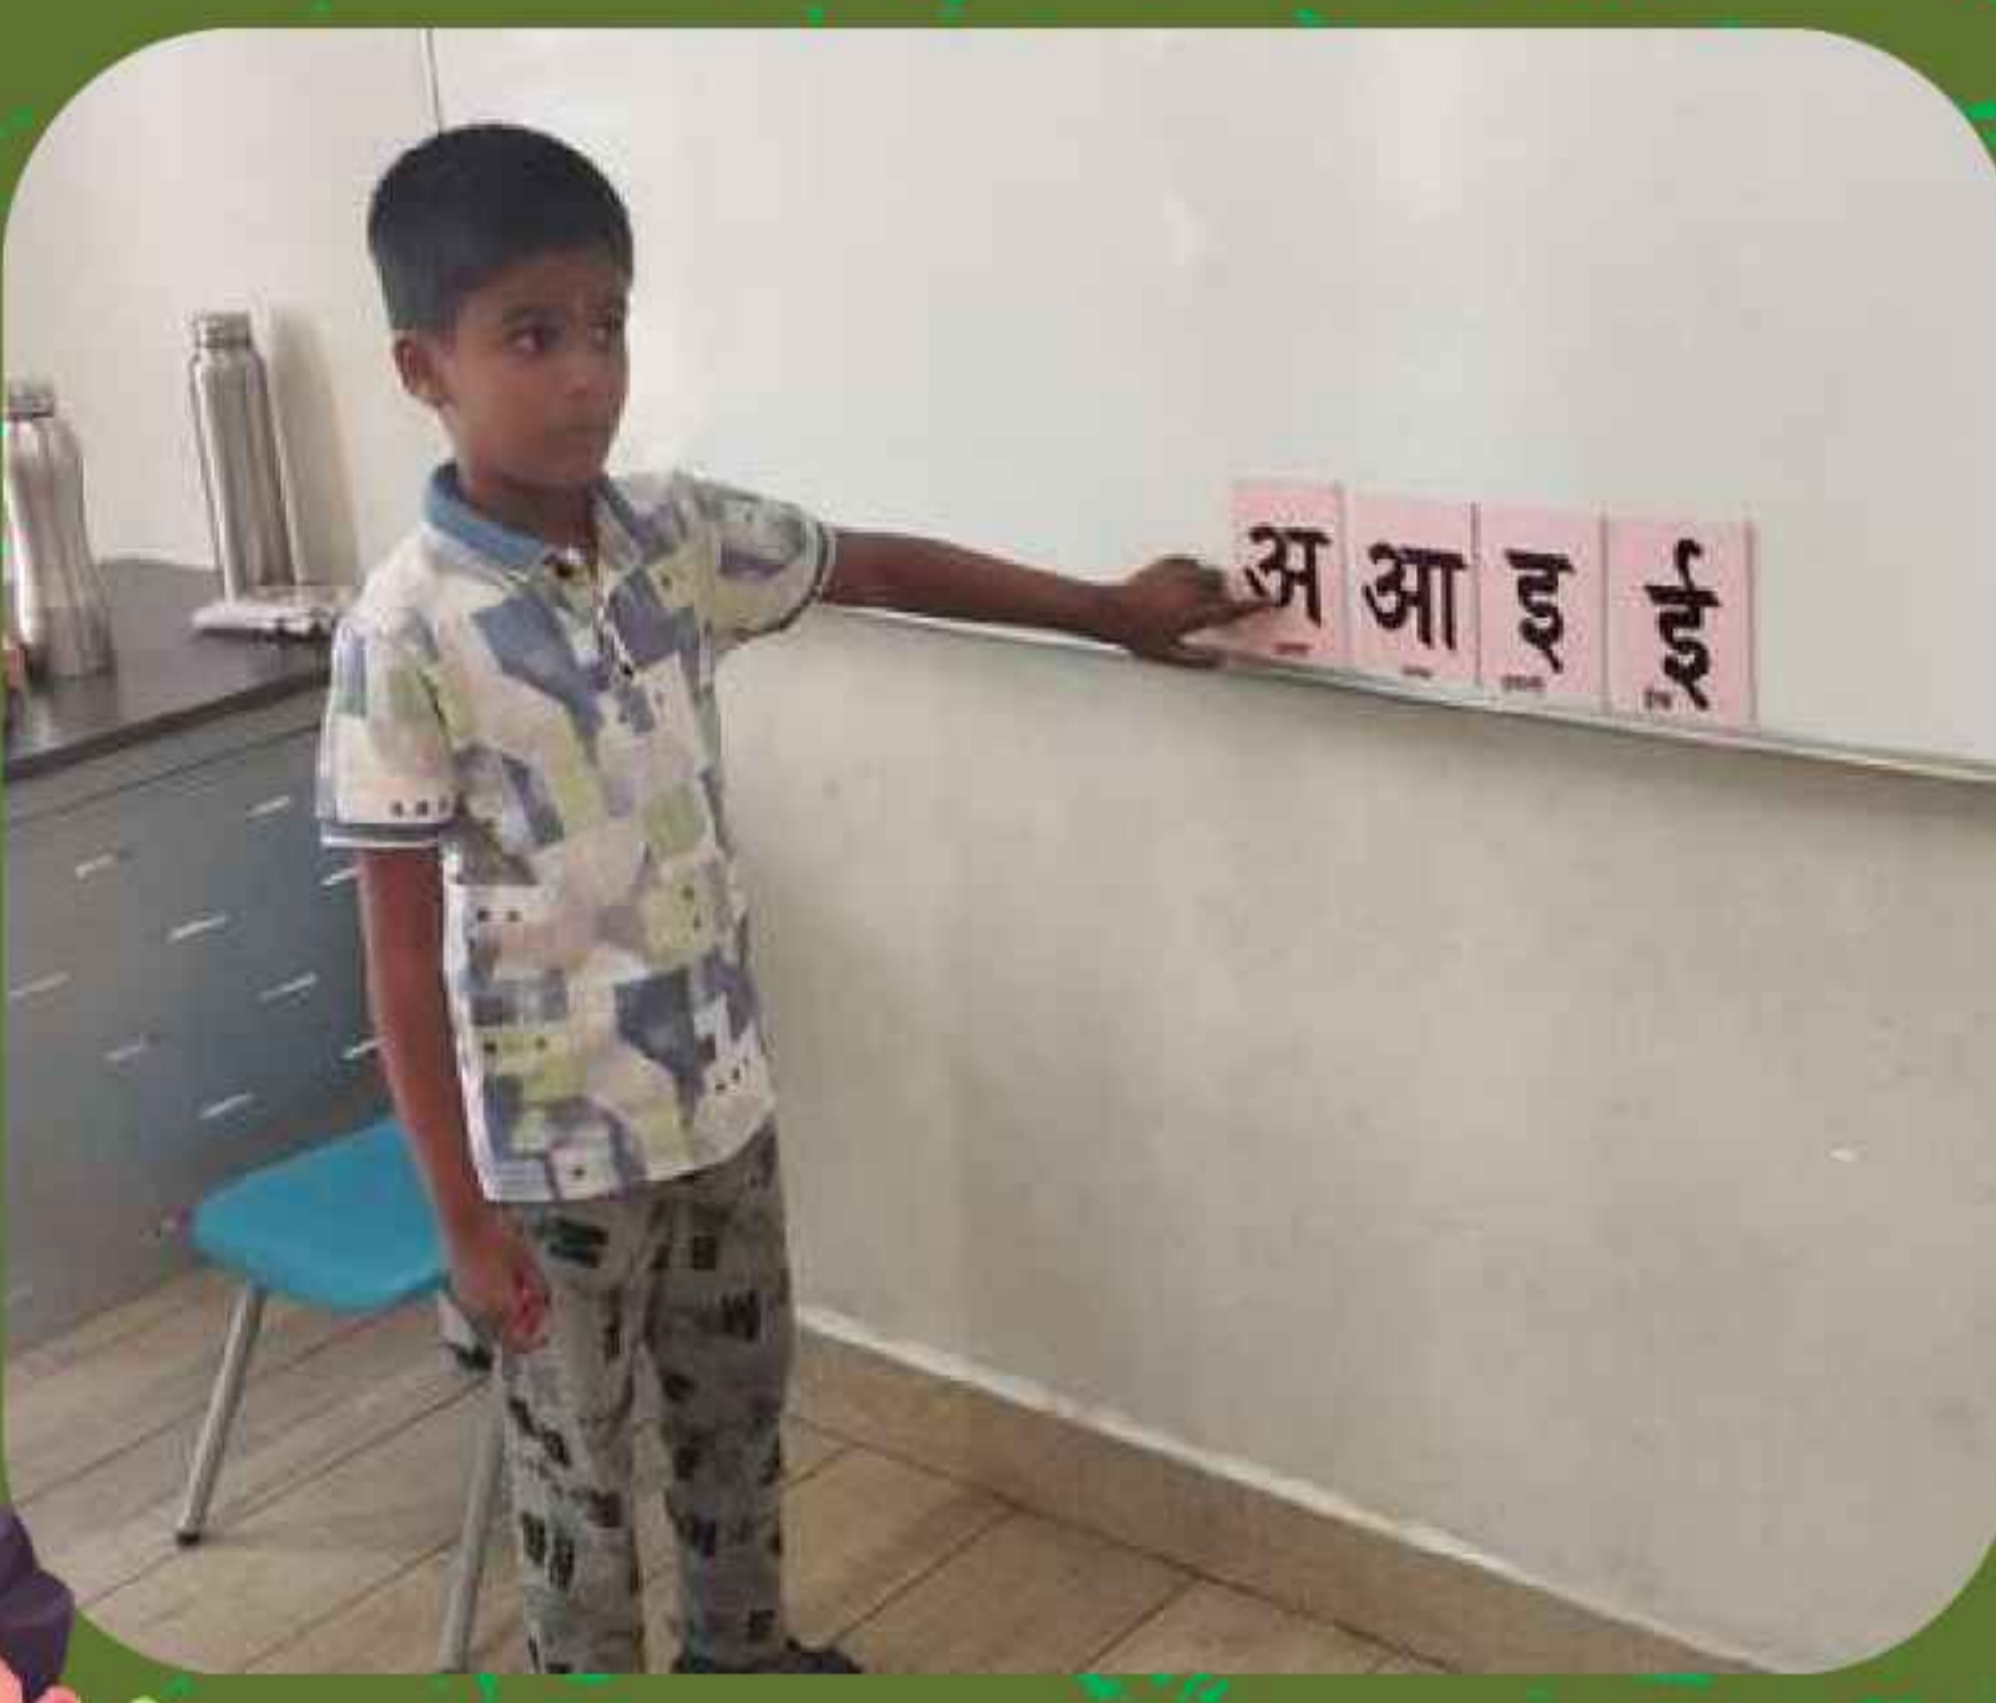

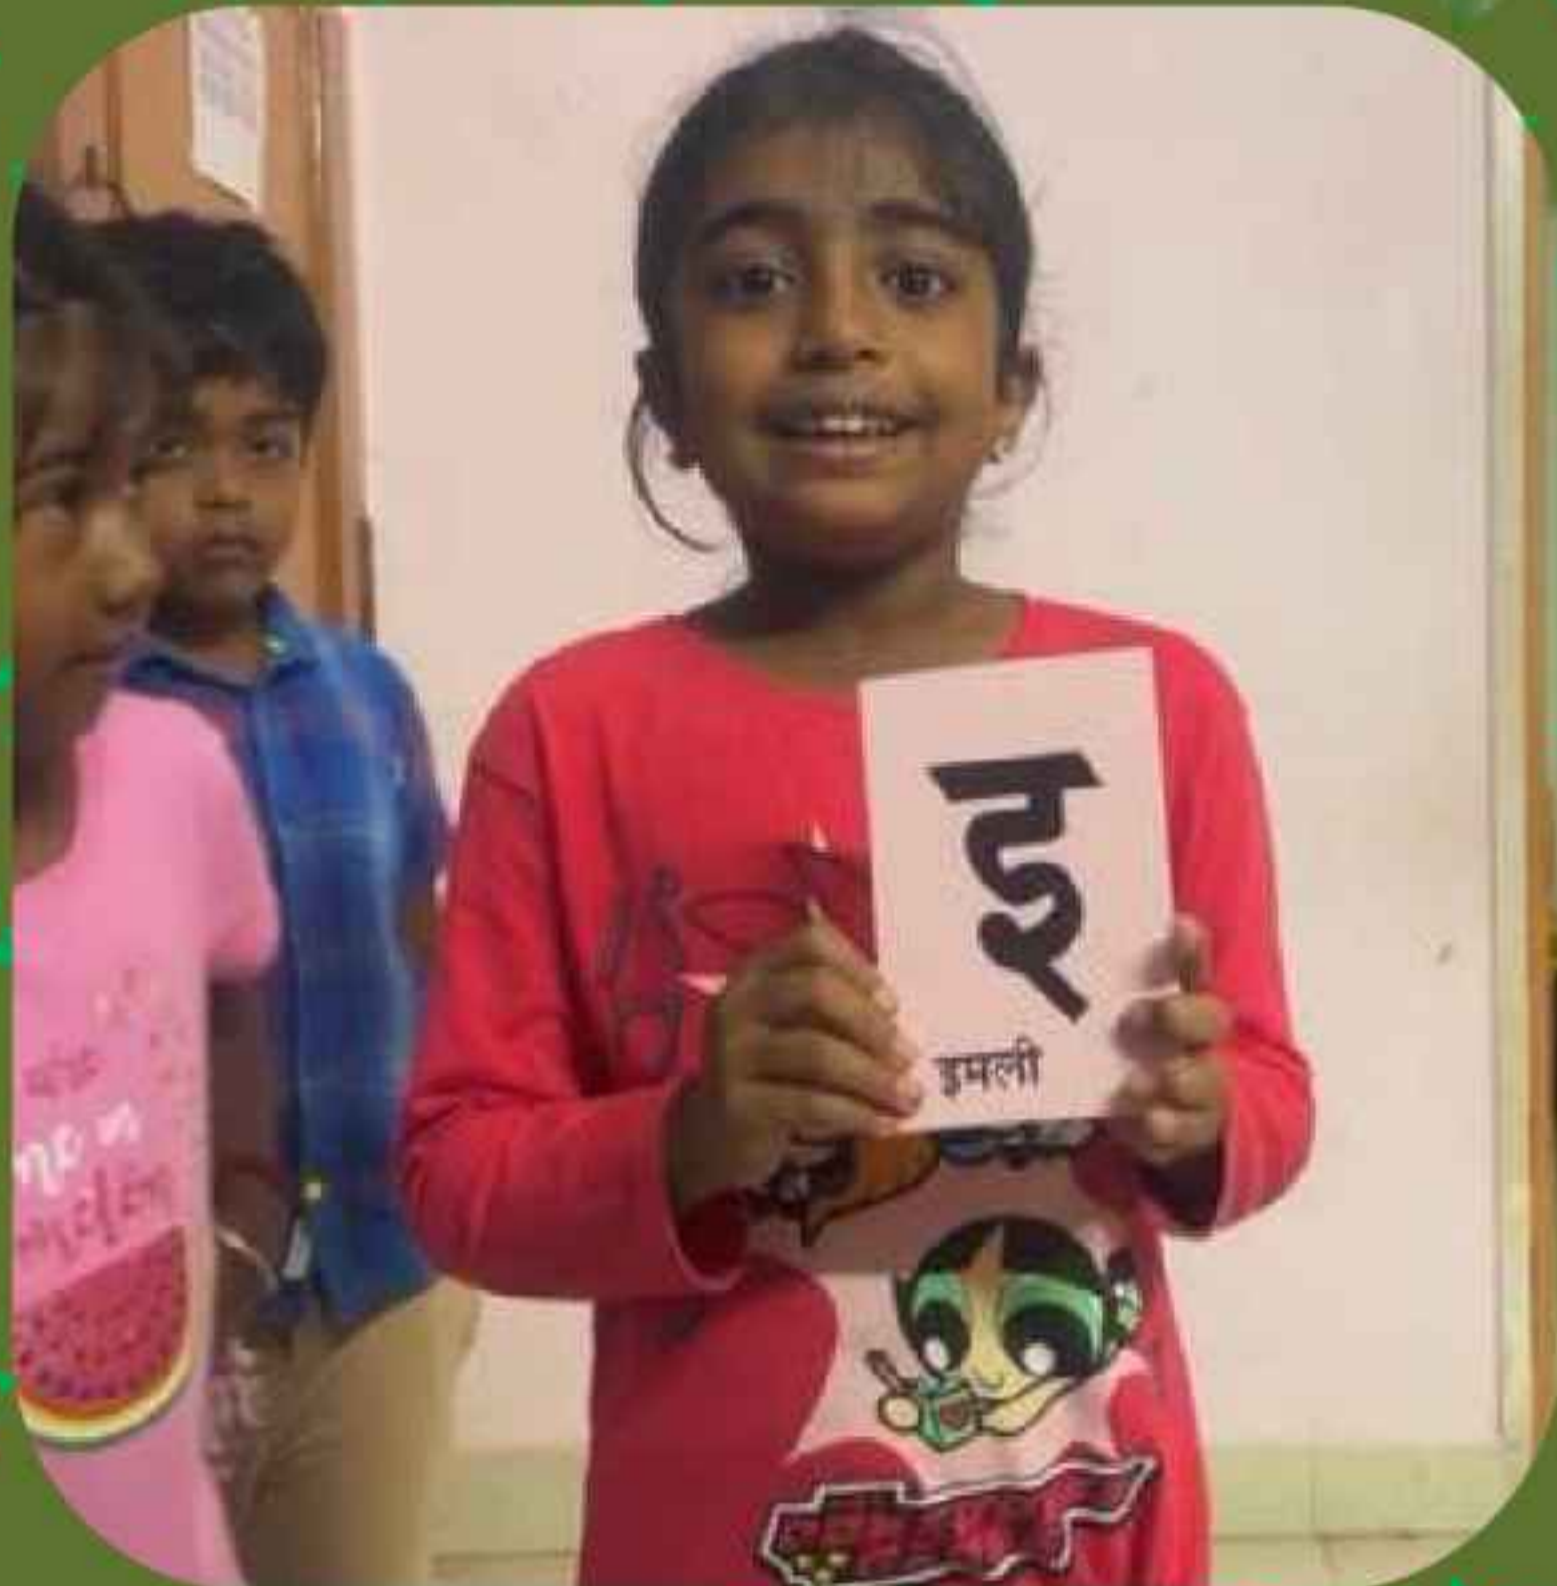

Rangoli is traditionally created on the ground with powders, but bringing this vibrant art form to paper is a fantastic way for children to turn their fingers into magic wands, discover hidden shapes, and play with color without the messy cleanup!

The Language Fun-Zone

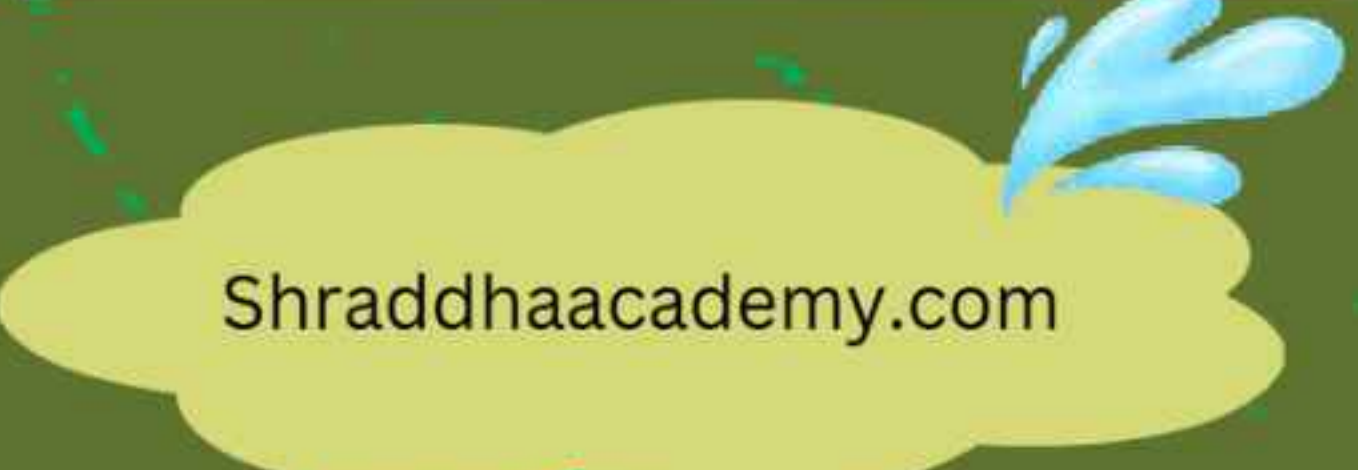

अ अ

தமிழ்

Exploring the secret language of loops and lines is like discovering the magic rhythm of our words! For children, the beautiful curves of Tamil and the structured lines of Hindi aren't just letters—they are drawings with their own special sounds and stories.

The Joy of Water Play

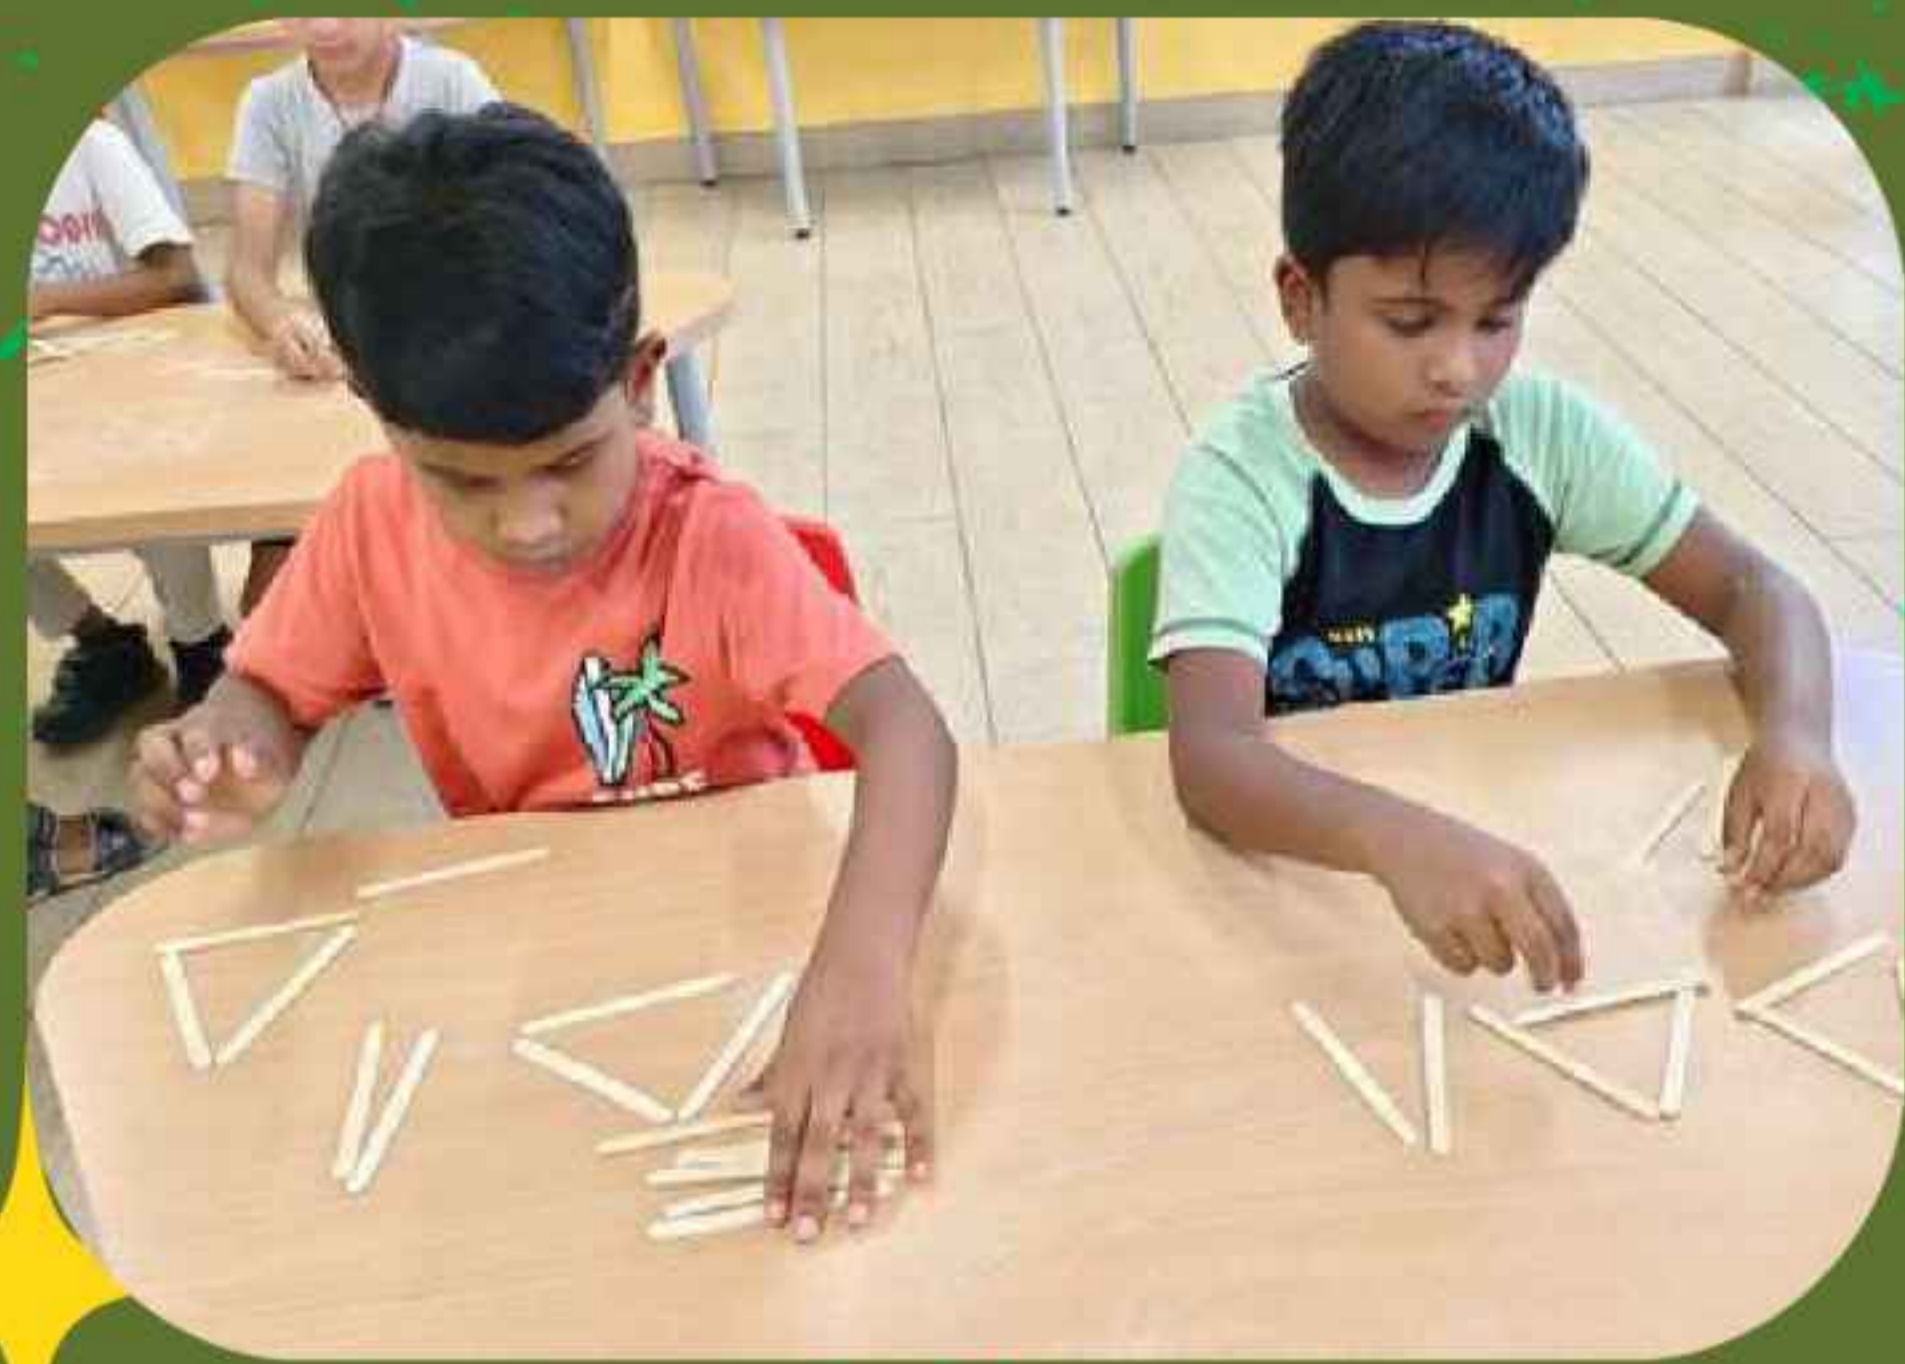

Water is the ultimate "open-ended" toy—a magic laboratory in a bucket! The kids absolutely loved every minute of the splashy fun. From the Giggle-Gushes of a big splash to the squish-success of a squeezed sponge, they were filled with pure excitement. It was a joyful celebration of discovery and total enjoyment!

Turning Scraps into Treasures!

Recycled newspapers and ice cream sticks are pure magic! Our little makers transformed these simple materials into extraordinary inventions.

The Spotlight Spark: Show & Tell Magic!

We ditched the prepared speeches for a surprise Show & Tell, handing the children random objects to present on the spot. It was incredible to see them speak so freely, skipping the hesitation or overthinking that we often face as adults. Their ability to dive right in shows just how natural and fearless their communication can be when they are given the space to be spontaneous.

Pure Joy: Unwinding at Shraddha!

**FUN
FUN
FUN**

At Shraddha, we believe that some of the best learning happens when children are simply relaxed and free to be themselves. Our "Fun Time" sessions are a dedicated space for little hearts to recharge and spirits to soar!
